

## **A Film Review: Garfield**

2B Wong Yuen Ling

I have just watched a film called 'Garfield'. It is an animation, comedy and family film. Garfield and Breckin Meyer are the leading actors in this film. Breckin Meyer plays the role of Jon, and Jennifer Love Hewitt is the leading actress, acting the part of Liz. The director of this film is Peter Hewitt, who is very famous. There are many 3D animations, special effects and stunts in this film.

The story happens at Jon's house. One day, Jon brings a dog, Odie back home. Jon likes that dog so he does not care about Garfield. It gets jealous of Odie. One night, Garfield takes Odie out of the house so Odie runs away and Happy Chapman steals it. When Jon knows Odie is lost, he goes to find it with Liz. Of course, they can't find it. Garfield knows how to find Odie, but nobody listens to him, so Garfield finds Odie himself. Luckily, Garfield can find Odie, and Jon and Liz find them, too.

In the story, Garfield is a fat, lazy cat that likes singing and dancing very much. He is very cute.

I will give full marks to this film because the 3D animations are really great and some of the scenes are very funny, too. When all the dogs and cats attack Happy Chapman to save Odie, Garfield told them how to act. This is the most memorable to me because the scene is very funny. My favourite conversation is the one where Garfield talks to a cat in a cage. Garfield always dances and sings and looks like a singer. I like everything about this film. I would recommend it to my friends because this film is really good and funny. Go and watch it if you do not want to miss it!
