

No-plastic-bag Campaign

3B Tsui Lai Yan, Annie

I would like to express my opinion concerning the issue that some supermarkets stop giving out plastic bags on Tuesdays. In my opinion, it is good for us to do so. I believe this for three reasons.

First, it can minimize the air and land pollution in the world. Using plastic bags may lead to air and land pollution. Have you ever thought about where the plastic bags go after we dispose of them? Those plastic bags are burnt or dumped into the landfills. Burning plastic bags pollutes the air and it is bad for our lungs. Moreover, dumping plastic bags into the landfills is a waste of land. The land can be turned into parks, for example. If we use fewer plastic bags, the air and land pollution will be reduced. Now, the campaign can help people remember to bring their own bags and bringing their own bags helps them use fewer plastic bags. Also, the people who do not want to spend \$0.5 for a plastic bag may bring their own bags. Later on, bringing recycled bags will become a habit. In this way, air and land pollution will be further reduced and people will not have to 'buy' plastic bags anymore. It is good for our health, too.

Second, more money can be used to help the people in need. As mentioned in the previous point, the people who want to get plastic bags on Tuesdays have to donate \$0.5 for each plastic bag. The money can be used to help poor people, so it is meaningful that supermarkets stop giving out plastic bags on Tuesdays!

In conclusion, I agree that some supermarkets should stop giving out plastic bags on Tuesdays because it can help reduce the air and land pollution and be used to help the people in need. I hope the people who disagree about this will be more concerned about the earth, which is in danger now. If we do not do something to help the earth, the earth will die and all of us will die, too.
