

The Advantages of Having a School Uniform

3C Yu Lok Sum, Ice

Nowadays, if we need to conduct a survey of the students at our school, I am sure that the majority of us will say that we should not wear school uniform as wearing it is troublesome. They also think that the design of the school uniform is old-fashioned too. Nonetheless, I completely and utterly disagree. In this essay, I shall explain why.

To begin with, wearing a school uniform represents our school and is part of our school's identity. It is necessary that everyone knows who we are and in which school we study when we do something good or commit a crime. For instance, if some pupils mess around on the bus, the bus driver will recognize the students and the school he or she comes from. As a result, the bus driver can complain to that school. Also, if students wear school uniform, they will remember that they are students and they will always be reminded of what students should do or should not do.

Furthermore, wearing school uniform can save our money and time. It saves time when choosing clothes before we go to school. We do not need to worry about what to wear to school every day too. Also, we can save money. If we do not wear school uniform, we will need to buy many different kinds of clothes since most teenagers like to dress differently and fashionably every day, especially in front of their friends and schoolmates.

Last but not least, we should wear school uniform as it reduces peer pressure. We can avoid comparisons of clothing among students. We cannot compare whether he or she is rich by his or her clothing. It reduces embarrassment among students too. Also, it is important that students pay more attention to their schoolwork than their looks.

All in all, we should wear school uniform because it is part of our school's identity. It does not only reduce peer pressure but also saves our money and time. I believe that if our school educates our schoolmates about the advantages of the school uniform, students will realize that.
